

# Managed Private Cloud

*Build a robust, always-up solution with the power of VMware!*

## Business Continuity – High Availability – Expert Management

“Sorry, the server is down.” It’s the phrase that sends a chill down the spine of anyone who runs an online service. Somewhere out there a piece of hardware failed and now you and your customers are nowhere.

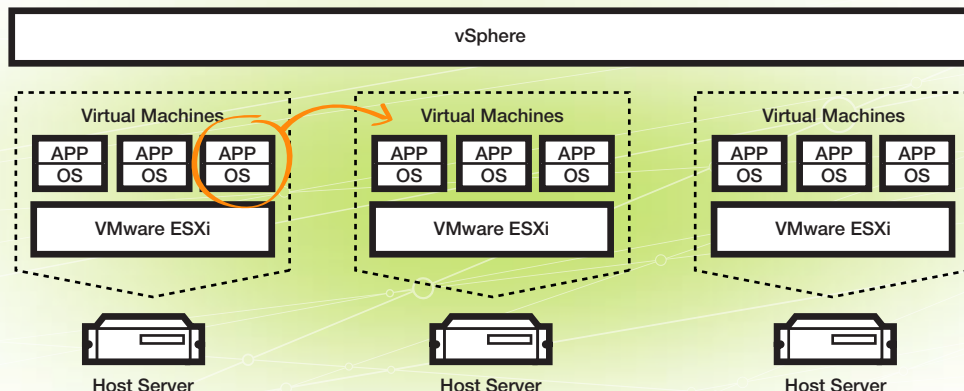

But what if you could make your online solution completely hardware independent? What if, when the hardware goes down, your server could move seamlessly to another piece of hardware, keeping your business up and keeping your customers satisfied?

### PEER 1 CAN MAKE IT HAPPEN!

We are proud to offer our Managed Private Cloud, powered by VMware, the industry-leader in virtualization technology. With the help of PEER 1’s team of VMware-certified experts, you can create systems as simple as a single virtualized server and as complex as your own private cloud.

### BENEFITS

- Enjoy unprecedented insight into your virtual data center. PEER 1 Hosting offers VMware the way they designed it!
- Manage and monitor your virtual machines directly through the vSphere client.
- Enjoy high availability and business continuity without soaring IT costs.
- Design and deploy your Private Cloud configuration with assistance from our certified engineers.
- Rely on 24x7x365 FirstCall Support™ whenever you need it.
- Customize your virtual data center to meet your rapidly changing needs. Whether it’s one server or a pool of servers, you can build up business continuity and deliver high availability throughout your virtual data center.
- Develop and test new configurations without adding costly hardware.
- Enjoy peace-of-mind knowing your Private Cloud is running on our high performance, highly redundant FastFiber Network™ backbone - backed by our iron clad SLAs.
- Support for advanced VMware features such as vMotion, Hot Add and Data Recovery, to provide an unprecedented level of uptime and availability.
- World class EMC CLARiiON SAN infrastructure & EMC CLARiiON expertise on staff.

## IN-HOUSE VMWARE EXPERTS AND FIRSTCALL SUPPORT™

We know you're going to enjoy the ease and simplicity that comes with our Managed Private Cloud. But in case you ever need help or run into an issue, we have seasoned IT pros available at a moment's notice to get it resolved fast. Our support team regularly monitors and manages both your virtual machines and the physical servers on which they reside. They also perform any necessary patching, and virus or operating system (Windows or Linux) updates as needed.

APPLICATION	 Add-on Services	Tivoli® Backup (best-in-breed, fast SAN backup)	<div style="text-align: center;">   <b>24x7x365</b>  <b>FirstCall</b>  <b>Support™</b> </div> <ul style="list-style-type: none"> <li>✓ VMware Certified</li> <li>✓ Network</li> <li>✓ Hardware</li> <li>✓ Application</li> <li>✓ Security</li> </ul>
	 Applications	Available OS options: Windows 2008 Enterprise and Data Center, RHEL 5, SQL, and MS SQL	
	 Virtual Guests	Quick provisioning, add-ons, scalability, customization, applications, patching, security	
	 Plan Options	Standard, Advanced, Enterprise Plus, vCenter, direct customer visibility with vSphere	
DESIGN	 Solution Engineering	VMware certified engineers design your solution for expandability, flexibility, power, and efficiency	
PHYSICAL	 Physical Hosts	Dell servers, loaded with memory, speedy processors, ESXi - The power of VMware	
INFRASTRUCTURE	 EMC CLARiON SAN	World-class, best-in-breed technology, expandability, flexibility, disaster recovery, high-availability options	
	 Our FastFiber Network™	Firewalls, IDS, unparalleled peering, monitoring, speed	

## PRICING

Our PEER 1 Solution Engineers can design a customized Private Cloud solution for you. Since we can't lay out every pricing option here, please call us for a price quote. From single server to clustered server solutions with support for varying levels of VMware features our Solutions Engineers are here to design a custom cloud for you!
