

Bare Metal Infrastructure as a Service Blended Colocation and Managed Hosting

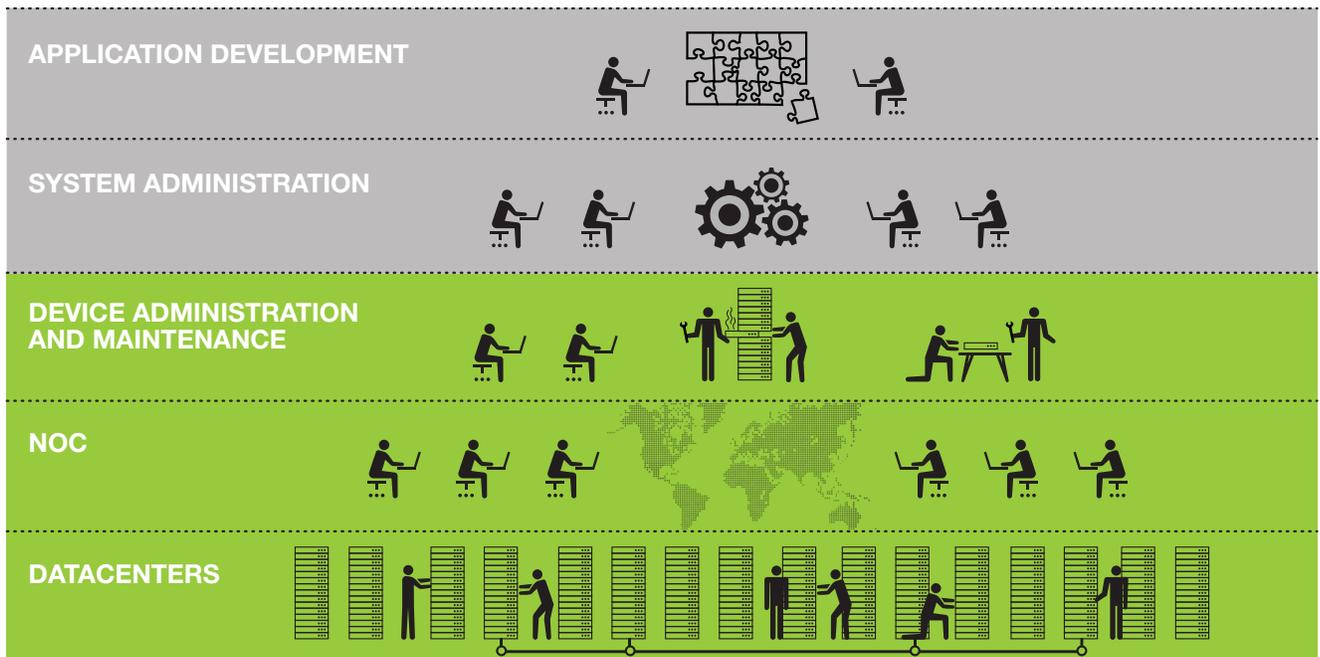

A perfect mix of bare metal infrastructure managed by PEER 1 Hosting and your own business innovation delivers value more flexibly and consistently than ever before.

Focus IT Staff on Innovation – Ideal Blend of Hosting Models - A Solid Foundation for Growth

Many companies want to outsource the management of their basic infrastructure, and still deploy and manage their unique operating system and applications. They don't want to devote precious IT resources to watching over servers. And they demand that those resources keep a constant watch on their critical systems and applications.

PEER 1 Hosting's Bare Metal Infrastructure as a Service delivers exactly this mix. We worry about procuring, tuning and maintaining the hardware. You maintain control over your critical OS and application layers. And it all runs in one of our state-of-the-art datacenters, connecting into our FastFiber Network™. With Bare Metal Infrastructure as a Service, we take on all the tasks that ensure your servers, systems and networks are always up and running at peak levels. You retain control over the tasks involved with managing your unique systems and applications.

It's a perfect combination.

Managed by you

Managed by PEER1 Hosting

BENEFITS

Reduce Systems Administration. Remove all the routine data center and network administration tasks that consume so much time and budget. We'll handle performance, operation, replacement, reboot and all the other day-to-day busy work associated with keeping your hardware infrastructure up and running.

Optimize Resources. Put your critical resources to work where they do the most good for your business. When your IT staff doesn't have to worry about routine hardware administration, they can concentrate on business innovation.

Retain Critical Systems. You'll continue to run any OS and customized application stack you choose. With Bare Metal Infrastructure as a Service, you retain complete control of (and constant access to) your OS and applications.

Lower Costs. Eliminate operating expenses by letting PEER 1 Hosting handle the daily tasks that consume so much expensive staff time.

Full Service. With Bare Metal Infrastructure as a Service, you'll take advantage of a wide range of services, including a Personal Account Manager, Personal Client Relations Manager, and our full support and services team.

FEATURES

Full Infrastructure Management. PEER 1 Hosting takes full responsibility for every aspect of your hardware and infrastructure. We'll handle everything, including server and port monitoring, reboots, and middle-of-the-night firefighting.

Datacenters. Your Bare Metal Infrastructure as a Service solution can be hosted at any of our 18 datacenters in Canada, the U.S. and Europe. Each facility is enterprise-grade, fully redundant and managed by the best NOC in the business.

FastFiber Network™. Our wholly owned and operated FastFiber Network—built from the ground up for hosting—ensures the optimal performance of your infrastructure. Beyond that, we have peering relationships with over 1,050 networks to ensure top network response.

Controlled Environment. Our datacenters have state-of-the-art environmental controls, including air conditioning, particulate filtration, anti-static flooring, UPS and advanced fire suppression.

Burstable Bandwidth. Take advantage of burstable bandwidth, to ensure you consume only the bandwidth you need, and only when you need it.

Unlimited FirstCall Support™. FirstCall Support means you have to make only one call to us to be certain of a rapid resolution to any issue. Our team of Level II and III System Administrators is available to you around the clock to ensure that your infrastructure is running smoothly and reliably.

Available Technical Resources. Our Systems Administrators and Network Operations Center (NOC) teams are available 24 hours of every day. They proactively monitor all network and systems performance, and are available to respond to your requests at all times.

100% SLAs. We keep our promises and offer best-in-industry SLAs. These include 100% Network Uptime, 100% Power On, and 1-hour hardware replacement guarantees.
